

ATTENTION ALL RFID USERS!

Notice of TIPS READ/WRITE Software Update to Version 3.5

Product Manager, Joint-Automatic Identification Technology (PM J-AIT), in cooperation with Unisys Corporation, is conducting a worldwide refresh of all fielded TIPS READ/WRITE software to Version 3.5. This software applies to PCs, Field Data Units (FDUs), and Early Entry Deployment Support Kits (EEDSKs).

Failure to upgrade could result in erroneous READ/WRITE data when used with recent productions of the ST-410 and ST-654 series RF tags containing serial numbers exceeding 1,048,575.

Simply write to (rfdimail@eis.army.mil) with the following information:

Name: _____
Unit/Organization: _____
Commercial Phone Number: _____
E-mail Address: _____
Automated Information System (AIS) Supported: _ ____
Government Point of Contact (Contractors
Only): _____

If you don't use TIPS with your application you still may require a Savi product for the RFID tag docking stations and handheld interrogators. Simply write to this same address and specify product and software desired.

WARNING....WARNING.....WARNING
